# Teleradiology Reporting Services

Teleradiology Reporting Through  
Expert Eyes

**Accurate | Fast | Affordable**

A person is shown in profile, looking at two computer monitors. The monitor on the left displays a document with text, while the monitor on the right shows a dark image, likely a medical scan, with some text on the right side. The scene is dimly lit, with a blueish tint.

## About Expert-i

Imagine a world where expert radiology interpretations are at your fingertips, anytime, anywhere. That's the reality Expert-i brings to life.

Since 2018, Expert-i has been redefining radiology across the Middle East, and Africa. We are a leading Teleradiology services company, fueled by a relentless commitment to quality, efficiency, and patient-centric care.

## Mission

Setting the gold standard in teleradiology with unyielding accuracy, superior expertise, and unwavering commitment to delivering the highest quality interpretations for every patient.

## Vision

To build a future where every patient receives seamless access to world-class radiology interpretations, empowered by our unwavering commitment to quality, technology, and partnership. We envision a thriving healthcare ecosystem where time and cost limitations vanish, replaced by accessibility, efficiency, and optimal patient outcomes.

# Our Core Values

## Excellence

Every pixel, every diagnosis, matters. We pour our passion into meticulous reporting, employing leading-edge technology and the sharpest minds to ensure unwavering accuracy.

Our pursuit of knowledge is endless, fueling a culture of continuous learning and pushing the boundaries of precision.

---

## Patient-Centricity

At the heart of everything we do is the patient. We strive for seamless, lightning-fast access to expert interpretations, putting patients well-being and care at the forefront of every decision.

Compassion and genuine concern guide our communication, ensuring a positive and reassuring experience for everyone.

---

## Innovation

We're not content with the status quo. We embrace cutting-edge technology and proactive problem-solving, constantly innovating to revolutionize Tele-radiology. This relentless pursuit of progress means faster diagnoses, smarter treatment plans, and a healthier future for all.

## Efficiency

Time is precious. We champion streamlined workflows and cost-effective solutions, eliminating delays and ensuring timely reporting. Our responsiveness and proactive communication keep everyone informed and empowered to make informed decisions.

---

## Partnership

Collaboration is our cornerstone. We build strong, symbiotic relationships with healthcare providers, fostering open communication and mutual respect. Together, we streamline workflows, optimize resources, and elevate the standards of medical care.

## Integrity

Transparency and ethical conduct are our north stars. Every interaction is guided by honesty and accountability, building trust and solidifying our commitment to doing the right thing, always.

# Our Services

## Teleradiology Reporting Services

### Final Reads

Comprehensive and detailed analysis of medical images by consultant radiologists, reviewed and validated for accurate diagnosis and treatment planning.

### Preliminary Reads

Fast and timely interpretations, ideal for international collaboration, urgent care settings or initial triage, followed by final reports for thorough assessment.

### Second Opinion Reads

Gain peace of mind with a second independent interpretation of study to make confident decisions.

### Subspecialty Reads

Benefit from the expertise of radiologists specializing in specific areas like cardiovascular neuroradiology, Musculoskeletal and more.

## Business Services

Training &  
Education

IT & Technology

# Teleradiology Coverage Models

## Multiple Coverage Models That Fit Your Needs

### Full Time Coverage

Best suited for facilities with high imaging volume and constant need for interpretation.

### After Hours Coverage

Ideal for facilities with moderate imaging volume but limited need for overnight interpretation.

### Vacation Coverage

Offers virtual locum temporary solutions for covering radiologist absences due to vacations, conferences, or illness.

### Nighthawk Coverage

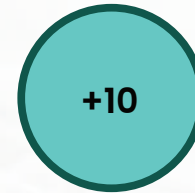

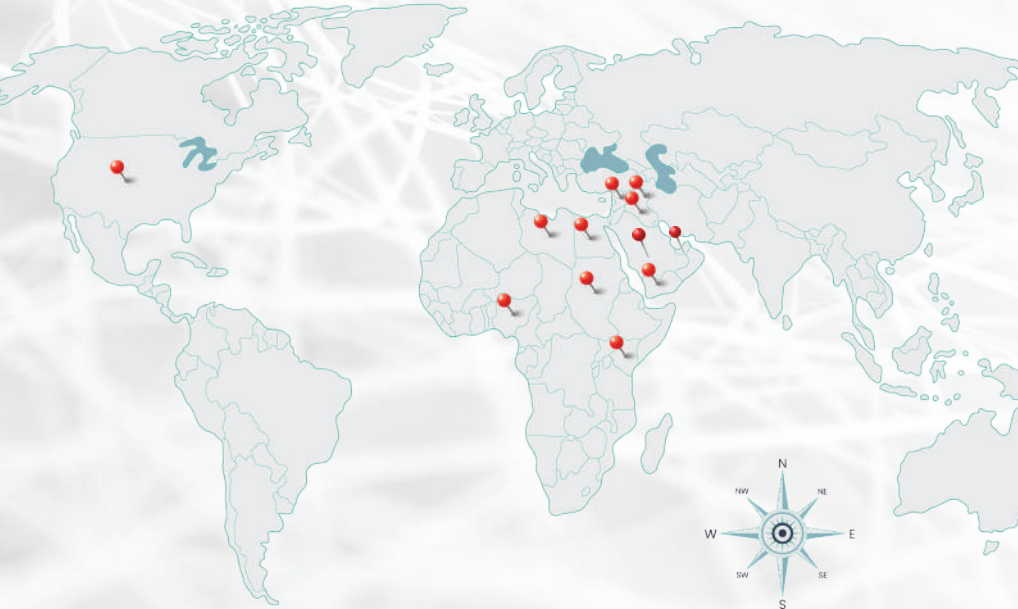

Specifically designed for overnight interpretation support, typically from 10 PM to 8 AM.

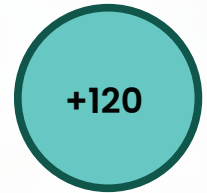

### Emergency Coverage

Provides immediate interpretation for critical imaging studies outside regular hours or urgent cases.

# Our Presence

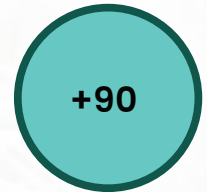

Countries

Facilities

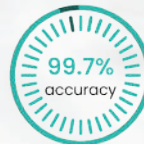

Final Reports

Radiologists

Egypt, USA, KSA, Jordan, Lebanon, Sudan, Yemen, Iraq, Libya, Kenya, Nigeria... and more

**Our Locations**  
Egypt | UAE | KSA

Complying with American College of Radiology diagnostic protocols.

# How Teleradiology Works at Expert-i

You are 3 simple steps away from starting the service

1

## Scan Patient

- Scan Patient
- Images go to PACS server / Modality Workstation

2

## Upload Study

- Send Images to Harmony Platform
- Assign study to a consultant based on specialty
- Image reading & primary report
- Quality assurance & report validation

3

## Download Report

- Notification sent to the Imaging Centre
- Report Ready for download

## Supported Modalities

U.S

X-Ray

Mammorography

CT

MRI

PET-CT

## All Subspecialties Supported

- MSK
- Neuro
- Head & Neck
- Women
- Pediatric
- Cardiovascular
- And others

**Fast  
Onboarding**

**Less Than 24 Hours**

You are just 24 hours away from starting a new era in your radiology practice towards excellence in imaging reporting

## **Responsive IT Support**

We have a dedicated team of professional IT engineers who can help you overcome any IT challenges.

# HARMONY PLATFORM

Teleradiology Workflow Management  
Platform Backed By Artificial Intelligence

Work Everywhere  
On Any Device

01

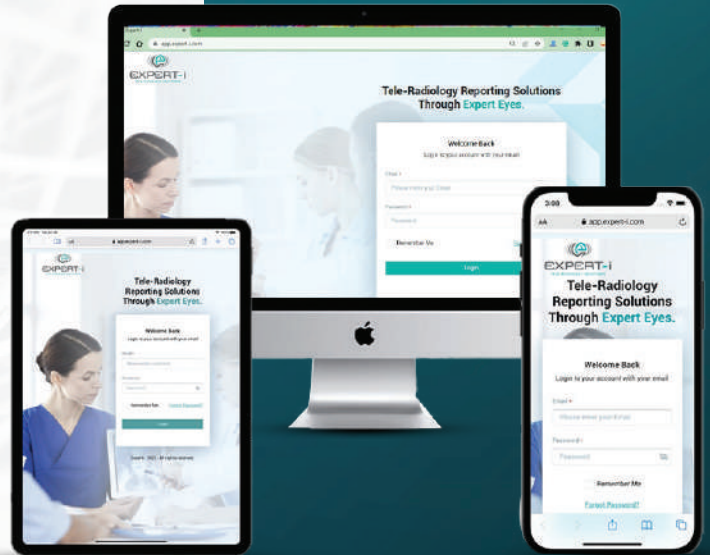

**DELIVER THE RIGHT STUDY**

02

**TO THE RIGHT RADIOLOGIST**

03

**AT THE RIGHT TIME**

# What is Harmony Platform?

A teleradiology workflow management platform specifically designed by experts in the daily practice of a radiologist. Created specifically to improve efficiency, decrease image transfer times and improve accuracy through minimizing errors and boost the workflow speed. Harmony is a double-sided platform that match the needs of radiologists and diagnostic imaging service providers with dedicated interface for each of them.

**Cloud Based**

**Integrated  
with PACS**

**HIPAA  
Compliant**

# Streamline Your Teleradiology Workflow With Next-Level Technology

# Core Competencies

## Why Choose Expert-i ?

### Extended Experience +90

More than 90 radiology consultants with +15 years of experience and growing

### Highest Accuracy Reports

We provide cutting-edge report accuracy of 99.7%

### Structured Reporting

We commit to standard workflows and reporting templates to guarantee the consistency of quality.

### Always Fast

Very responsive and our TAT < 30 minutes for emergencies

### 24 Hours Coverage

Uninterrupted services during day and night all year round.

## **Service Affordability**

We provide competitive prices to suit all your needs

## **All subspecialties Included**

All modality Subspecialties are Supported to cover all exams.

## **Innovative Technology**

Orchestrated operations with our teleradiology workflow management platform (Harmony).

## **Strong IT Support**

We have dedicated IT team to support you in getting onboard fast

## **No Hidden Cost**

Just pay for your usage without any fixed subscriptions or hidden fees.
